SUMMARY

A recent computing graduate with commercial experience working in software development. I have gained 1 year of work experience under a commercial company as an apprentice during my gap year with exposure to a full agile software development cycle as a member of a team. This includes working on the front and backend of the web systems, conducting tasks such as integrating UI designs, testing and publishing to the live systems mainly using C#/ASP.NET, HTML, CSS, SQL and Umbraco. I am actively looking to learn and gain professional experience in software development while embracing the challenges ahead of me in future projects and endeavours.
